

Start

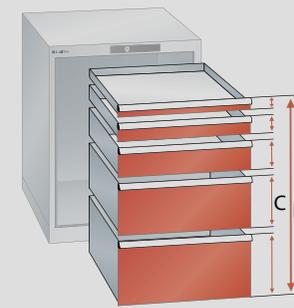

- Select cabinet base area $W \times D$ and cabinet height H
- Select colour

1. Housing

- Select housing **1** from various housing heights (A)
- Housing selection always includes the desired locking system KEY, CODE, RFID or AUTO Lock

2. Drawers and pull-out shelves

- Select drawers **2**
- Determining front height, load capacity and drawer safety device
- Sum total of drawer front heights (C) must correspond to the clear height of the housing (B)
- Optional: pull-out shelves 75kg/200kg **4**

3. Accessories

- Configuration with interior hinged doors with appropriate adjustable and pull-out shelves possible **3** to **5**
- Select cabinet accessories such as ribbed mat, cover panels, housing base, pallet truck/forklift base and leveling feet **6** to **10**
- Mobile cabinets **11** require a drawer safety device and a mandatory safety rod
- Optional: utility trolley **12**

4. Partition material

- Selection of partition material for drawers, see section «Partition materials & labelling system»
- Note: take into account drawer height and usable dimension.

4 TIP

Combine drawers and pull-out shelves

With drawer cabinets, pull-out shelves can be installed for very high and bulky goods. In this case the lock is freely accessible and the drawers above the shelf or shelves cannot actually be locked.
